SUMMARY

Software Developer with strong foundations in Java, OOP, and SQL, and experience building backend-driven applications using Hibernate and relational databases. Skilled in designing modular systems and writing optimized queries. Passionate about solving algorithmic problems and continuously improving software engineering skills.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript
Backend Development: Servlets, Hibernate(JPA), JSP, Spring Core
Frontend Technologies: HTML, CSS
Database and Queryings: SQL, MySQL, PostgreSQL
Core Concepts: Object-Oriented Programming, Data Structures, Collections Framework
Tools: Maven, Eclipse IDE, VS Code

PROJECTS

Smart Campus Placement System | Java, Hibernate, SQL, HTML, CSS, JavaScript **2025**

- Designed and developed a placement management platform supporting Admin, Recruiter, and Student roles.
- Implemented backend modules using Core Java and Hibernate ORM for efficient database interaction.
- Designed normalized relational database schema with 5+ tables and implemented complex SQL queries including joins and CRUD operations.
- Improved maintainability through modular backend design and systematic debugging.

Parking Management System | SQL, DBMS, ER Modeling **2025**

- Built a console-based Java application to manage student profiles and skill records.
- Implemented CRUD operations using ArrayList and HashMap for efficient data storage and retrieval.
- Applied OOP principles including encapsulation, inheritance, polymorphism, and abstraction.
- Designed modular program components improving scalability and maintainability

Student Skill Tracker | Core Java, OOP, Collections **2025**

- Designed a SQL-driven Parking Management System with normalized relational tables and strong constraint handling.
- Implemented vehicle tracking and slot allocation logic using joins and transactional queries
- Built billing logic using SQL date-time functions to calculate parking duration and charges.
- Strengthened expertise in query optimization, data consistency, and real-time reporting.

CODING ACHIEVEMENTS

- Solved 150+ problems on LeetCode and GeeksforGeeks, strengthening problem-solving and analytical thinking.
- Practiced data structures and algorithms including arrays, strings, searching, sorting, and hashing.

EDUCATION

Shri Guru Gobind Singhji Institute of Engineering and Technology

B.Tech - Information Technology - CGPA - 7.27

2021 – 2025

Nanded, Maharashtra

CERTIFICATIONS

- **Java For Beginners - Udemy (2023)** 
- **HTML, CSS, JS : Udemy (2024)**
